

## **FAQS T7316E + T24 KIM**

### **Q. Does the BST CAP (T7316E+T24) replace the M-Series CAP (M7324+CAP)?**

A. Yes, the BST CAP will be the central answering position for Norstar and BCM. Due to software support schedules, the M7324 CAP will remain available through calendar year 2003.

### **Q. Does the T7316E replace the T7316?**

A. Yes, the T7316E replaces the T7316 for Norstar and BCM. The T7316E is backwards compatible and will function identical to the T7316 when installed on Norstar (pre-release 6.1) and BCM (pre-release 3.5).

### **Q. Is the T24 KIM backwards compatible?**

A. No, the T24 KIM does not function on software releases prior to Norstar 6.1 and BCM 3.5. For such solutions, the M7324+CAP are recommended.

### **Q. Can the T7316 support the T24 KIM?**

A. No, the T7316 cannot support the T24 KIM. The T24 KIM is only compatible with the T7316E and Norstar 6.1 and/or BCM 3.5 software.

### **Q. Will there be an installed base program for evolving customers from the M7324+CAP and T7316 solutions to the BST CAP?**

A. Yes, there will be installed base packages that include the T7316E, T24, and MICS 6.1 software cartridge at a special price. See the Norstar 6.1 Sales and Marketing bulletin for details.
