

# 3300 | CITELink Gateway

Thinking about evolving your communications infrastructure to Voice-over-IP but want to protect your existing investment in Nortel Networks telephone sets? Now you can with Mitel Networks 3300 CITELink Gateway.

### **Evolve to IP, Protect Phone Set Investments**

Mitel Networks CITELink Gateway enables Nortel Networks Norstar telephone sets to seamlessly operate on the advanced, IP-based Mitel Networks 3300 Integrated Communications Platform (ICP). No need to discard or replace existing Nortel sets – a significant savings considering sets typically constitute up to two thirds of the cost of a new voice system.

### **Your Existing Telephones Support Advanced IP Services**

Once connected to the CITELink Gateway, Norstar telephones have access to the IP feature set delivered by the Mitel Networks ICP. There is no phone rewiring needed. Just install the Gateway along with the Mitel Networks 3300 ICP, update the function key labels on your Norstar phones, and start taking advantage of your new IP environment.

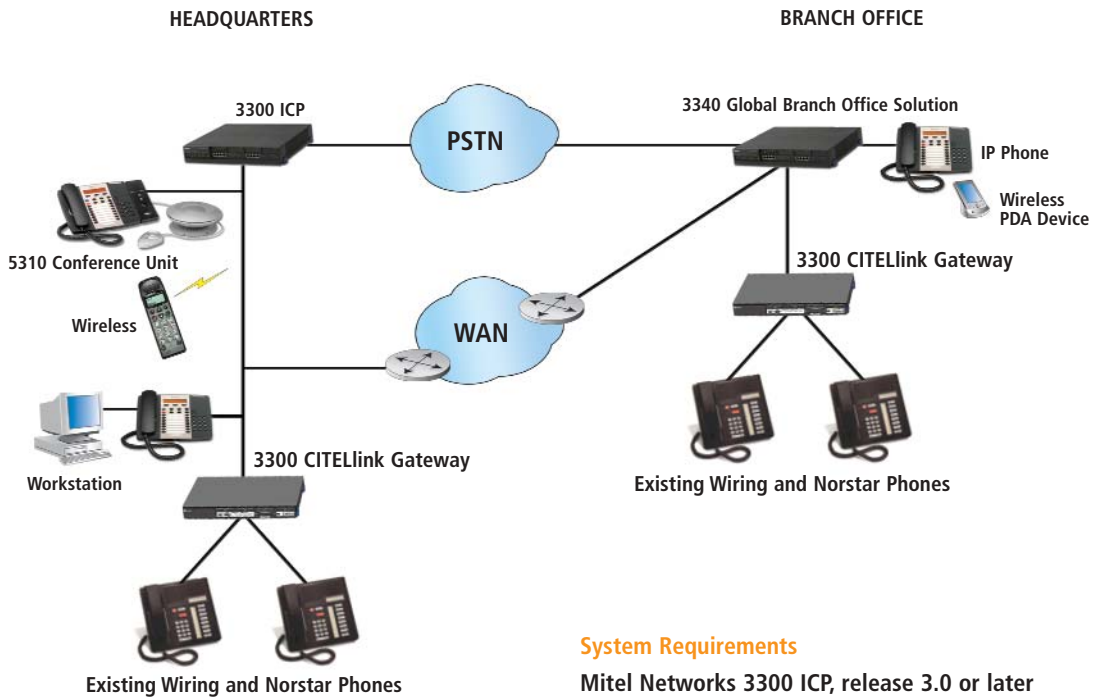

### **Opens the Door to Voice-over-IP**

The CITELink Gateway is an ideal solution for organizations that have been reluctant to implement IP because of their existing investment in Norstar phone sets. Now they can deploy a proven, scalable Mitel Networks 3300 ICP and easily connect remote offices or groups of users equipped with Norstar sets with the simple addition of a CITELink Gateway. This allows organizations to retain legacy phone sets and existing wiring, to deliver consistent service across the enterprise, and to minimize user disruption – all while enjoying the strategic benefits of a far superior IP-based communications system.

it's about **YOU**

Mitel Networks 3300 CITELink Gateway integrates with Mitel Networks 3300 Integrated Communications Platform (ICP) to enable Nortel Norstar telephone sets to operate like Mitel Networks IP Phones. The result: evolve to IP while protecting your existing investment in Nortel telephone sets.

**System Requirements**

Mitel Networks 3300 ICP, release 3.0 or later

**Mitel Networks 3300 Integrated Communications Platform**

Mitel Networks 3300 ICP is the robust, feature-rich enterprise IP platform already delivering the benefits of convergence to companies and organizations across sectors and around the globe. Supporting the industry's richest IP telephony feature set, the 3300 ICP gives enterprise users access to advanced converged applications for messaging, collaboration, teleworking, device integration, contact centers, mobility and more.
